"COLLECTION OF BEAUTIFUL IDEAS"

BATHROOM LIGHTING achieves a dual effect. Bright light should enable you to perform tasks more effectively, such as applying makeup or shaving while the style should also bring the look of your bathroom to life. Single sconces on both sides of a mirror can provide a very elegant effect. However, to achieve a light level, a 3 or 4 light sconce, either inset or mounted on top of the mirror itself may be needed. LED technology and good quality glassware combine to allow for better overall illumination while providing energy efficient, long lasting and cool burning LED dimmable bath choices. All LED'S are engineered to last for many hours.
